## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wong et al. (U.S. Patent # 6,775,164 B2) in combination with Cama et al. (U.S. Patent 6,211,457 B1).

Wong et al. disclose the claimed subject matters an electronic power converter (figure 1-3), including an encapsulated portion and circuit board (column 3, line 20-25).

However Wong et al. does not disclose the utilization of the technique for an integrated connector. Cama et al. teaches the utilization of the similar technique for an integrated connector (figure 1, item 18). It would have been obvious one having an ordinary skill in the at the time the invention was made to modify Wong et al.'s power supply by technique taught by Cama et al. for the purpose or securing firm connection with external devices.

***Allowable Subject Matter***

3. Claims 8-13 are allowed.
4. Claims 2-7 and 17-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
